## GR 2.2

### Daily Coffee Grinder Cleaning Instructions

Remove brew basket holder by lifting up slightly and pull holder towards you.

Using a damp cloth wipe down lower shelf and coffee outlet area of grinder. Dry these areas with a towel. Wipe down remaining surfaces of grinder.

Re-install brewer basket holder lining up flanges on holder with corresponding holes on grinder.

If needed refill grinder hoppers by opening hinged top cover.

Pull hoppers straight up and out of grinder using the handle provided.

Remove black cover from hopper and pour whole beans into hopper.

Return hopper to grinder making sure that the hopper nestles squarely into the hopper manifold.

Close hinged top cover if top does not close properly hopper may not be install properly. Pull up on hopper and re-install.

Using warm water and food safe soap wipe down all surfaces removing all coffee oils from surfaces including black cover. Then dry carefully removing all moisture before filling hoppers with coffee beans.

Pour coffee beans back into hopper topping off with fresh beans if needed.

Return hoppers to grinder making sure that the hopper nestles squarely into the hopper manifold.
