## Coffee Grinder Operating Instructions

1  
Select a 13" x 5" coffee filter, being careful to only select one. This will help prevent over extraction of the coffee and the brew basket from over filling.

2  
Place filter into brew basket making sure that sides of filter are standing upright in the basket this will help prevent coffee grounds from getting into the finished product.

3  
Insert brew basket into brew basket holder on grinder making sure basket is pushed in all the way.

4  
Select desired batch size and push start switch in.

5  
Pull brew basket from coffee grinder you will see that the coffee bed is mounded in the middle. Shake brew basket to level out coffee bed.
